

Fill in the descriptions below for each operator. You can use this in the future as a reference guide to help you with your labs.

Operator	Description
+	Add two operands or unary plus
-	Subtract right operand from the left or unary minus
*	Multiply two operands
/	Divide left operand by the right one. (always results into float)
%	Modulus- remainder of the division of left operand by the right
**	Exponent-left operand raised to the power of right
//	Floor division- division that results into whole # adjusted to the left in the # line
